To avoid updates of the kernel version at cmspix:

Login as root

```
cd /boot/grub/
vi grub.conf
```

Change default variable to desired kernel number:

```
default=1
```

Currently the desired kernel number is:

```
#2.6.32−431.5.1.el6.x86_64
#2.6.32−431.17.1.el6.x86_64
2.6.32−504.16.2.el6.x86_64
```

(Get value for „default" by counting the „title" starting from 0 up to the desired kernel number).

In general to get de
For example:

```
ls /lib/modules/2.6.32−431.5.1.el6.x86_64/extra/
```

```
if new driver is needed go to:
/home/cmspixel/rpmbuild/RPMS/x86_64
and rebuild following instruction on POS twiki
```
