Postdoctoral position in Condensed Matter Theory at the University of Zurich

The Condensed Matter Theory Division at the Department of Physics of the University of Zurich invites applications for an open PostDoc position.

We look for a motivated researcher with a doctoral degree in condensed matter theory, who enjoys cracking challenging problems using both numerical and analytical approaches, and who is a good communicator as well as a great team player.

The successful applicant will work in the group of Prof. Tomáš Bzdušek on the exploration of quantum systems, topological matter and metamaterials. The postdoc will benefit from interactions with the rich local scientific environment within the group and beyond (University of Zurich, Paul Scherrer Institute, ETH Zurich) and from our network of international collaborations.

The two-year appointment is envisioned to start between October 2023 and April 2024. The competitive salary follows the University of Zurich salary scheme for postdoctoral researchers. The University of Zurich is committed to promote gender equality and diversity.

To apply, please send to cmt-applications@physik.uzh.ch your CV together with a research statement (2-3 pages), which should include a description of your previous research experience and a discussion of your research interests. Please indicate “[TM3 – postdoc]” in the email subject.

Further, please arrange for at least three confidential letters of reference to be submitted to cmt-applications@physik.uzh.ch. To receive full consideration, all application materials should be submitted at latest on **March 3, 2023**. However, applications will be considered after this deadline until the position is filled.

More information on the Condensed Matter Theory Division at the University of Zurich can be found on our [website](#).
