Good bye!

Scientific Programming with Python

Federica Lionetto, Nicola Chiapolini, Roman Gredig & Christian Elsasser

Material

- ▶ The material will remain accessible on the homepage and we will add a zip-file containing all lectures.
- ▶ But we will move the school page to the section "Previous Schools" (http://www.physik.uzh.ch/~python/python/previous.php) in a few days.

Survey

- To get some feedback and see what we should keep and what we might need to modify for the next school we set up a short survey at http://www.physik.uzh.ch/~python/python/survey.php
- Please fill in your opinion in the next few days, thank you!

Confirmation

- The confirmation of your participation is available here in the room.
- People not here can collect it later by contacting Nicola.

Post-School Mail

- In a few days, you will receive an email from us summarizing this info
- . . . and reminding you of the survey.

Next Edition

- Not yet clear if and when the next edition will take place (and also with whom).
- For sure not before the next summer break!
- If you know people who are interested in the course, please refer them to the our newsletter (http://www.physik.uzh.ch/~python/python/newsletter.php). We will distribute information about an upcoming school as soon as there is information to share.

Staying in Touch

- ▶ We will allow ourselves to inform you about next editions of the school via mail so that you can – if you'd like – advertise it to colleagues.
- ▶ You can anytime send mails to us via our addresses on the webpage.

Finally: Clearing

You are free to stay and ask further questions.

However, before you leave

- ▶ Please help us clear the room.
- ▶ Remove the paper from your nametag and leave the plastic case on the table in the front row.

Happy Coding!

Thank you for joining.

We wish you a nice summer and happy coding.
